

OVERVIEW

I have extensive business and consultancy experience managing large teams and providing strategic direction in the private and public sector. I highlight the following capabilities and skills to demonstrate the breadth of coverage I bring to the table:

- Strategic leadership and developing high performing teams
- Experience across all phases of the contract life cycle
- Leading Major Projects on-site
- Experienced in major projects and functional governance processes
- Working in the resources sector
- Assisting SMEs and Indigenous Businesses with growth and governance.

I am skilled at providing strategic advice to both my clients and colleagues, acting as a trusted adviser to ensure project contract terms are applied to actively maximise my clients' as well as my employer's financial objective, whilst identifying potential risk and opportunity factors along the way.

- State Manager
- Senior Project Manager
- Project Manager

PROFESSIONAL EXPERTISE

- Stakeholder engagement
- Project management
- Design management
- Project cost & schedule management
- Project planning
- Procurement & contract management
- Stakeholder liaison

During the past two years I have specifically focused on assisting Indigenous Business Enterprises (IBE) get established both in Defence and in the resources sector, as well as with local Govt. In this regard my involvement has evolved to provide guidance on all business matters relating to the commercial management associated with operating a business with a turnover of circa \$40m p/a.

During my 5 years at JLL I was the National Account Director for their Defence Account with responsibility for all JLL's deliverables and KPIs on a 10-year engagement with Defence (DEWPO). In FY18/19 I had responsibility for JLL achieving a spend of \$318m, rising to \$357m in FY19/20. In FY20/21 targets increased further by 10% to approximately \$400m. There were 105+ JLL employees on the Account delivering more than 400 projects at any time of the year for Defence. All projects were required to achieve the Value for Money requirements of the Commonwealth.

I provided direction, governance, and guidance on all aspects of JLL's delivery model from initial Project Briefing, Scope and Feasibility, Design (30% / 90%) through to Defence approvals prior to projects being published to market on Austender. Procurement involved assessing Tender returns and creating Tender Evaluation Board Reports for each project for Defence endorsement. Once approved my regional delivery teams would then deliver each project on site acting at the Commonwealth's Representative.

I lead my teams to be part of an honest and ethical team environment that is characterised by integrity, empathy, and accountability for ones' actions and behaviours. My aim is always to uphold confidence for both my clients and my colleagues. My personal values and behaviours are very important to me and are the foundations on how I approach my work as well as my personal life. My behaviours are always above-the-line, focusing myself and encouraging others in teamwork, ethics, and excellence.
